30. (Currently amended) A process for the production of triacylglycerol, comprising growing a transgenic cell or transgenic organism according to claim 16 which contains a nucleotide sequence SEQ ID NO: 1 from *S. cerevisiae* or a DNA encoding SEQ ID NO: 2, such as 95% identical to SEQ ID NO: 1 under conditions whereby a nucleotide sequence encoding an enzyme is expressed, in which the said enzyme catalyzes in an acyl-CoA-independent reaction the transfer of fatty acids from phospholipids to diacylglycerol in the biosynthetic pathway for the production of triacylglycerol ~~is expressed and whereby said transgenic cells comprising~~ comprises an enzyme ~~catalyzing which catalyzes~~ in an acyl-CoA-independent reaction the transfer of fatty acids from phospholipids to diacylglycerol in the biosynthetic pathway for the production of triacylglycerol.

31. (Currently amended) A method of producing triacylglycerol and/or triacylglycerol with uncommon fatty acids which comprises transforming an organism or host cell using the nucleotide sequence of ~~claim 7~~ SEQ ID NO: 1 from *S. cerevisiae* or a DNA encoding SEQ ID NO: 2, such as 95% identical to SEQ ID NO: 1, whereby the transformation results in an altered, ~~preferably,~~ increased oil content of the cell or organism.
32. (Currently amended) A method of producing triacylglycerol and/or triacylglycerols with uncommon fatty acids ~~using~~ comprising transfecting a cell or organism with the nucleotide of sequence SEQ ID NO: 1 from *S. cerevisiae* or a DNA encoding SEQ ID NO: 2, such as 95% identical to SEQ ID NO: 1 of claim 7.
